

Tips for Kitchen Remodeling:

The first step is to decide on your objectives. Do you want a complete kitchen remodeling, which would include moving walls, replacing all appliances, plumbing fixtures and counter tops.

The following questions will help you decide:

- Do I want a completely new look in my kitchen?
- Do I need more cabinets and counters space?
- How old are my appliances?
- Do I want to upgrade my appliances?
- Do I want to add a workstation for my computer, fax and/or telephone?
- Do I want to change the floor plan, knock down some walls to expand the size of the kitchen and/or add a center island?

Once you've figured out what you want, it's time to think about what types of products are available.

1. Look through magazines that feature kitchens that appeal to you and visit showrooms to become familiar with what products are available.
2. Make a list of things that you would like to have in your new kitchen.
3. Do a complete research on appliances, plumbing fixtures and cabinets styles and colors.
